REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: New claim 18 was added to the case and includes the limitations that the rake bar includes a rectangular downward facing channel member having forward and rearward plates, each of the plates having a free lower edge for engaging the ground and a blade mounted to the forward plate. These limitations in combination with the remainder of the claim are not found in the prior art.

The closest prior art of record is US 2005/0006112A1 (Smith) which discloses a grader having a channel member with two plates and a blade attached to the forward plate. However, the grader in Smith is for attaching to a bucket and not a wheels frame as in the combination. Smith uses the channel member so that the grader can be flipped over by the bucket. There is no suggestion or motivation to the grader in Smith with the lever in Potter. Byman 5,497,569 and Ressinger 2,902,909 also show a channel shaped member on a grader. However, the plates in these references are made from flexible material. Therefore, there would be no motivation or suggestion to attach blades to the plates.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
